

Why Do I Need A Managed Network Provider In My Rental Cottage?

Your guests expect all the comforts of home and more when choosing a rental cottage. Since greater than 90% of vacationers have a high speed internet account at home, this means they expect one in your rental property as well. Offering this most-requested amenity is a great way to increase your number of rented weeks and bolster your cash flow. If you've ever been to a hotel or resort that offers internet access, you know this amenity is made up of 3 crucial parts:

- 1) **Enough internet bandwidth to share amongst all the guests in your property**
- 2) **A secure wireless network managed and maintained by professionals**
- 3) **Expert 24-hour phone support backed by a next-day onsite IT service provider**

You wouldn't dig a hole in your backyard, fill it with water, and advertise it as a swimming pool would you? Then you shouldn't buy the phone or cable company's bundle product and try to call it an amenity either. The bundle gives your guests one third of the total solution they need, and completely ignores their need for help. It takes more than just an unmanaged bandwidth account to meet your guests' needs, so why not give them the total solution?

It doesn't cost more...it actually costs less!

The bundle is a better deal for the phone and cable company than it is for you. We recently saw a deal for around \$120.00 for phone, data, and video. At about \$40.00 per month per service it sounds good, huh? Well our basic plan costs less than \$40.00 per month and offers 3 times the service and support. RenterNETUSA offers the complete solution – supported by RF/Cable, PC Support, and IT/Networking experts - not just delivery guys. No other single

provider on the Outer Banks offers all of the following services from one source:

- **Your choice of 3.0 Mbps or Blazing Fast 7.0 Mbps connection speeds**
- **Fully Managed 802.11g wireless networking with Security – a MUST to protect you from potential liability and your guests from identity theft**
- **10/100 Wired Ethernet Networking**
- **24-Hour Phone Support for you AND YOUR GUESTS by experts in PC troubleshooting**
- **Next-Day Onsite Support backed by certified IT Professionals**
- **Hassle-Free Maintenance – without service calls and fees!**
- **Constant monitoring and interaction with ISP to prevent outages and unhappy guests**

You cannot buy the services we provide from any other provider at any price. The phone and cable companies don't support your guests, and are notorious for taking many days to get to your property in cases of trouble. They typically do not support the wireless network in your cottage, and charge you exorbitant fees if they get involved and the problem is not related specifically to their bandwidth. Our packages include everything you AND your guests need, tailored specifically to the rental industry, with no hidden costs. By providing the best available service, we retain over 90% of our clients each and every year. We've doubled in size every year we've been in business. More than 25 Property Management Firms and 900 Outer Banks Rental Property Owners can't be wrong!
